THE LEADER IN LIQUID APPLICATION EQUIPMENT PARTS AND ACCESSORIES

STS

(SMART TRANSFER SYSTEM) is designed to make adding chemical and surfactants quick and easy to your application equipment.

TANK DESIGN

The tank is designed with a molded 2" outlet for 100% drain, eliminating any raised lip or flange that holds chemical residue. Anti Vortex Blade improves efficiency by 15% to 50% depending on installation!

CONTROL HANDLES

Control Handles positioned at ergonomic working height allow the operator to function the valves while never having to reach down under the tank.

HINGED LID

Standard with a 16" hinged lid and tank rinse plumbing make inducting chemicals fast and easy.

THE FOUR LEGGED WELDED STAND IS STOUT ENOUGH TO MOUNT THE STS INDUCTOR SYSTEM ON A TRUCK AND STABLE ENOUGH TO SET ON THE GROUND.

STS INDUCTOR SYSTEM

<u>Item #</u>	<u>MFG #</u>	<u>Description</u>
5281637	STS-40	40 gallon tank and stand with outlet valve and valve control handle
5281633	STS-402E	40 gallon tank and stand with 2" eductor system with control handles
5281634	STS-403E	40 gallon tank and stand with 3" eductor system with control handles
5281638	STS-65	65 gallon tank and stand with outlet valve and valve control handle
5281635	STS-652E	65 gallon tank and stand with 2" eductor system with control handles
5281636	STS-653E	65 gallon tank and stand with 3" eductor system with control handles

OPTIONAL JUG RINSE KITS AVAILABLE

WHETHER YOU WANT A JUG PIERCING CUTTING BLADE OR ROTATING RINSE NOZZLE ASSEMBLY.

Simply remove the lid screws and drop in the jug rinse kit that meets your application needs.

Kit Includes: Jug rinse insert, plumbing for inside tank and 3/4" ball valve and fittings with 5' of 3/4" hose.
